

# City Light

**A campus dedicated to innovation, fostering collaborative work, interactions and a sense of community.**

## CLIENT

Solvay

## TEAM

Patriarche Group:  
Patriarche (Architecture, Interior architecture, Landscape, Urban design, Environmental Building Quality [EBQ], and BIM)  
Patriarche Ingénierie (General construction and cost assessment)  
Patriarche Creative (Signage)  
Partners:  
Egis, Tecta, Inddigo, Base, Convergence, and NewQuest

## KEYPOINTS

Project organised around a central avenue.  
Extensions possible.  
Coworking.  
New Ways of Working (NWoW).  
Chemical laboratories and clean rooms.

## ENVIRONMENTAL PERFORMANCE

Objective: BREEAM (Building Research Establishment Environmental Assessment Method) 'Excellent' level certification.

The City Light building is a veritable beacon in the heart of Lyon's "Chemical Valley".

The project aims to transform the site into a welcoming campus of innovation and a global centre that will foster collaborative intelligence at all stages in the production process.

A showcase for the brand, City Light's facade allows Solvay to be recognised from the outside and conveys the company's values through a dynamic and contemporary design.

Designed as a continuous wave and in relation to nature and the landscape the building's form provides all workstations with an unobstructed view of the outdoor park and lets in lots of natural light.

Typology  
**Industry, offices, and laboratories**

Construction cost  
**110 M€**

Status  
**Competition winner 2018**

Surface area  
**40,000 m<sup>2</sup> of floorspace**

Location  
**Saint-Fons, France**

Allocation mode  
**Project management (MOE)**
